SERVICES, INC.

ENGINEERING • GLASS • MANAGEMENT

Founded in 1986, as Ebony Glass & Mirror Company (a Georgia corporation), minority owned and operated - based in Decatur, Georgia, was formed with the vision to establish a commercial glass and glazing firm that would grow to be one of the finest companies in the glass industry. Over the years, Ebony Glass & Mirror (EGM) has grown into a company which is respected throughout the industry for quality work with professional delivery. This growth and progress is attributed to the support of highly skilled glaziers and loyal, dedicated, competent personnel.

In the mid 1990s, EGM expanded its horizons to become a general contractor/construction manager, under a mentor-protégé

program. During this era, EGM became a graduate of the 8-A minority participation program. It was also during this time in which numerous corporations, municipalities, and counties

throughout the Eastern United States certified EGM as an MBE. Some of the projects completed during this period of GC/CM experience are: Adamsville Recreation Center, Hartsfield-Jackson Air Cargo and Concourse "E" Four Gate Expansion, and the Technical Support Campus.

As EGM moved into the 21st century, there came an opportunity to further diversify; and we did. EGM has diversified into engineering services, sewer engineering and sanitary sewer evaluation services. We have partnered with several respected

Zoo Atlanta

and notable companies and established key relationships in the water and sewer industry.

On November 26, 2008 we became.... EGM Services, Inc.

EGM specializes in providing Engineering Services, Glass Services and Program Management/Construction Management Services for municipal, commercial, educational, and governmental clients. Assisting our clients manage their multi-year design projects, construction projects (including glass & glazing) and water and wastewater system

improvements and related construction programs is our prime objective. EGM can execute a project from inception of the idea through project close-out and final review; commencing with the planning, pre-design and design, and continuing with aggressive management techniques during solicitation, bid award, construction, move-in and completion of post construction activities. For every project, EGM utilizes each opportunity to control the cost and minimize the construction schedule while consistently providing a quality project.

ENGINEERING SERVICES

Pole Bridge Trough

DeKalb County – Snapfinger/Pole Bridge Plant Expansion

As a member of the DeKalb Water Alliance, a world class team formed specifically to successfully deliver the Snapfinger and Pole Bridge Creek Waste Water Treatment Plant Expansion, EGM, in an engineering role provided Support Design and Construction Management for this high profile project.

DEKALB COUNTY - On-call Engineering Services

Services provided:

Developed a safety and health manual for the DeKalb County Department of Watershed Management, to provide a comprehensive, user-friendly resource for all employees and management.

Snapfinger Grit Screw

ENGINEERING SERVICES

Pole Bridge Aeration Basin

Working directly with department management staff, our initial step was to establish goals and objectives for the safety and health manual. A detailed outline of roles and responsibilities was developed, along with pertinent safety and health topics for each operating group (plants, water quality laboratory, construction and maintenance, office and warehouse, and other field operations). The manual also

provides specific guidance on training, important recordkeeping and tracking requirements, and effective implementation of Department safety and health policies and procedures.

Snapfinger Aerator

GLASS AND GLAZING SERVICES

Over the years, EGM has participated on projects such as: Atlanta City Hall, Fulton County Government Complex, The Georgia Dome, Turner Field, AT&T Promenade, the Olympic Headquarters, Atlanta City Courthouse, Atlanta City Detention Center, Clayton State University Learning Center and numerous projects for the Atlanta City & DeKalb County school districts. EGM has also prosecuted numerous projects at Hartsfield-Jackson Atlanta International Airport including notable projects like Concourse “B” Centerpoint Expansion, Concourse “E”, Concourse “E” Four Gate Expansion, Concourse “T”, and The Technical Support Campus. Recently completed projects include Jonesboro High School, Wachovia Bank—Fairburn, the New World of Coca-Cola, Trinity Office Park—Phase III, Honda DTX South facility and the Translucent Curtain wall Replacement—Main Terminal,
